# SAFEGUARDING FINANCIAL INSTITUTIONS

**Financial institutions are under immense pressure to reduce costs and increase efficiency.** As business and retail banking is becoming more competitive, many banks and credit unions are streamlining their operations to become more customer-focused and improve performance.

G4S is Canada's leading security solutions company, offering integrated security services to clients in a wide range of industries. A trusted partner with established networks and strong relationships with leading national banks, we bring together expertise in cash management and intelligent systems, management of one of the country's largest workforces, and the knowledge derived from providing security in diverse regulatory environments around the world.

We are proud to be a Canadian company servicing the security needs of Canadian institutions and the Canadian public. We work with thousands of clients across the country, and are the employer of choice for security professionals in Canada.

With G4S Canada as your security partner, you can rest assured that we will deliver a full, end-to-end security solution that meets your specific needs. By looking at the challenge of not only managing security, but also managing the cash cycle, we can help financial institutions to manage cash more efficiently, protect assets, reduce costs and deliver a better experience for the customers they serve.

Let us help you to see the opportunities that exist in the challenge of securing your world.

### **RISK360™**

The RISK360™ software suite is designed to give you actionable data through effective incident management. It provides:

- The ability to track and manage incomplete incident events
- A basis for developing security plans and budgets for personnel, systems, and training
- An excellent tool to synthesize data for Security and Risk Management Departments
- A smart and effective way to leverage existing resources for cost efficiency and support of the organization's goals
- Case management with business intelligence to help understand trends and escalations in your risk environment

### **Security Audits and Benchmarking**

For clients with existing security systems and procedures already in place, our Risk & Compliance division offers complete system assessments. Audits cover all aspects of security-related matters, and make recommendations for future steps where deemed appropriate or necessary.

across the world. Our experience has taught us that the key to wider  
oping comprehensive solutions to achieve long-term results.

### Secure Technology

We have decades of experience in delivering optimized, seamless secure technology solutions. We can envision, design, build and maintain secure technology systems to meet all our clients' needs, including video surveillance, access control, and intrusion detection/alarms.

### CASH360™

CASH360™ is a truly comprehensive cash management solution, optimizing every process. By integrating CASH360™ with all elements of the cash cycle, clients can expect tangible, bottom-line benefits, including:

- Reduced costs
- Improved cash flow
- Greater accuracy
- Detailed audit trail
- Full online reporting
- Increased customer focus
- Improved accountability
- Decreased internal loss

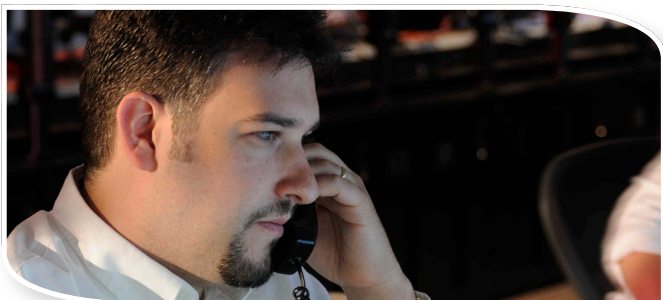

### Security Personnel

G4S provides the most extensive security training available. Our programs are developed and administered by in-house Trainers and Instructors, as well as external consultant experts. We provide additional customized training to suit client needs, and are thus able to fulfill any current or future training requirements.

### Mobile Services

G4S's alarm response services deploy a national mobile fleet management approach to streamline communication of security protocols and client requirements. Our systems enable real-time dispatch to mobile units nationally and ensure that G4S Control Centre operators can track all responses based on service level requirements.

### Incident Response Centres

The Incident Response Centres serve as a 24/7 single point of contact for incident management and response. Provided off-site or on client premises, we can custom-build support systems to suit our clients needs for real-time decision support, dissemination of risk identification, and incident notification.
