Introducing
RISK360® Incident & Case Management

- Increase efficiency & productivity of the asset protection & loss prevention teams.
- Assess, reduce & prevent risk.
- Promote standard investigation practices.
- Optimize case management from apprehension through restitution.
- Advance in real time.

RISK360® allows customers to manage, respond, investigate, analyze and aggregate data to mitigate risks through optimization and allocation of finite loss-prevention resources. RISK360® captures information from a smartphone, e-mail or by computer entry.
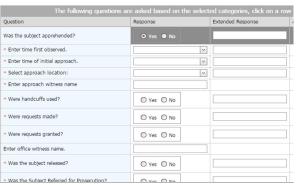

As patterns and trends emerge, customers can make fact-based decisions to reduce exposure. RISK360® supports a continuous improvement business model, identifying countermeasures and then analyzing and measuring the effectiveness of implemented changes.

Case Management

Vital information and support documents are a click away. Resolve and track issues from inception to "case closed." Retrieve video surveillance, pictures of a slip and fall, and information about suspicious individuals in one easy location. RISK360® provides a clear audit trail of all activities and supplemental documentation.

Mobility

The RISK360® mobile smartphone application allows users to report events as they occur using voice-to-text. The ability to take and attach photos and submit incidents in real-time provides data to make informed decisions. The app is easy to configure and provides myriad reporting options.

Information Capture: *Create custom questions to ensure capture of specific information in the proper format to drive best practices.*
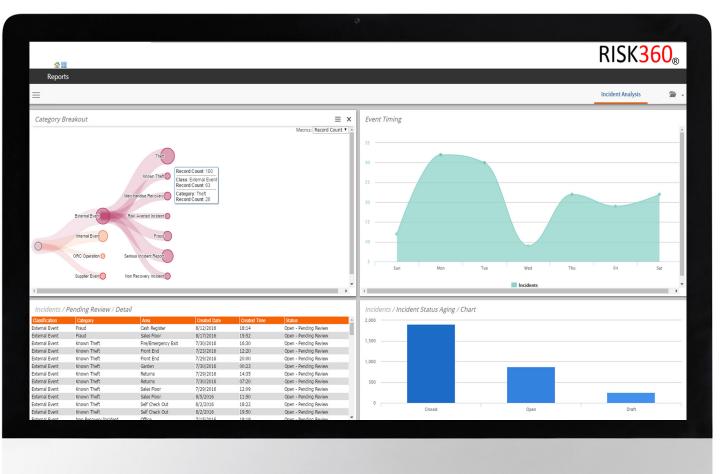

Auto Task Generation: *Custom tasks automatically generate based on incident classification and category for consistent follow up.*

Routines & Assessments: *Establish custom routines and surveys for any circumstance.*

Customized Dashboard for Retail Management

Person of Interest Database

RISK360® allows organizations to maintain their Top 10 Most Wanted suspects (by location) in one easy dashboard. This searchable database contains persons, vehicles and property associated with any incident and enables you to quickly identify repeat offenders or issue immediate BOLO (Be on the Lookout) notices to any pre-determined group.

Advanced Reporting

RISK360's easy reporting tool allows you to create reports to fit your needs. Dashboards can either be standard or customized by you to ensure each group receives the information in an easy-to-digest format. RISK360® provides real-time reporting to provide up-to-date information whenever you need it. Create and schedule monthly reports to automatically send to third-party restitution firms or utilize our automated third-party civil restitution functionality.

Compliance

RISK360® helps companies manage compliance. The software provides proper documentation and audit reports so customers can be sure they are meeting industry-specific compliance requirements on a provincial and federal level.
