

Video Surveillance

As public and private security concerns continue to grow, network video offers a clear competitive advantage. Network video is more flexible and more cost-effective than analog video, and delivers superior images and intelligence capabilities. Whether integrated with existing technology, or as a new installation, a well-designed network video solution improves the productivity of your surveillance system.

G4S is Canada's leading provider of integrated security solutions. Our team of security technology experts custom-designs solutions to suit your unique needs.

We work closely with you to ensure that our systems are future-proofed and maximize return on investment. We deliver the best products on the market to our valued clients, through longstanding partnerships with major security technology suppliers.

We carefully select the cameras that work for your installation and your existing infrastructure, to ensure that your technology spend is invested effectively. From standard-

setting to the tried-and-true, our cameras, recorders (DVR/NVR), Video Management Systems (VMS) and video analytics technologies are dependable, designed for your environment, and deliver reliable performance day after day. Each video system we install is custom-designed to suit your security and safety needs.

Contact G4S's consultants today to discuss which video technologies are the right solution for you.
